SUMMARY

Senior Full Stack Engineer with 7+ years building web and mobile applications in enterprise SaaS and fintech. Designed a multi-tenant pricing platform used by 10+ enterprise clients including Lenovo, HP and Dell, and built a loan origination app with Aadhaar, KYC and credit bureau integrations. Currently building LLM features (RAG, tool calling) into full-stack applications.

SKILLS

Frontend: Angular (12–18), TypeScript, JavaScript, RxJS, Ionic, Angular Material, HTML, CSS
Backend: Node.js, NestJS, Express.js, LoopBack 3, REST APIs, microservices, third-party API integration
Data: MySQL, MS SQL Server, MongoDB, Redis, TypeORM
AI integration: LLM APIs (Gemini), RAG, vector search (Qdrant), embeddings, function calling
DevOps & Tools: Docker, AWS, CI/CD, Git
Practices: multi-tenant SaaS, rule engines, code reviews, mentoring, Agile/Scrum, production support

EXPERIENCE

Senior Full Stack Developer — PyxTech Pvt. Ltd., Pune — Oct 2024 – Present

- Build PyxFMV, PyxTrade and PyxQuote (Angular 18, Node.js, MySQL): pricing, trading and vendor bidding platforms for the US refurbished electronics market.
- Designed the **multi-tenant SaaS architecture** serving **10+ enterprise clients** including Lenovo, HP and Dell, with tenant-level data isolation.
- Re-architected the Bulk Quote Engine with stream-based chunking and worker pools: processing time for 1,200+ row vendor files dropped from **~15 to 3.4 minutes (−77%)**, memory stays **under 250 MB**, and out-of-memory crashes stopped. Root-caused a spreadsheet extent bug creating 3,496 empty chunks and added bounds checks.
- Delivered pricing, bidding, shipping and MRB dispute workflows across 3+ user roles; added Redis caching for hot API and database reads.
- Mentor 3+ developers and work directly with business stakeholders on requirements and releases.

Senior Full Stack Developer — CodeNgine Technologies Pvt. Ltd., Pune — Sep 2023 – Oct 2024

- Built modular Angular and Node.js applications with REST services on Express.js and LoopBack 3 (MongoDB, MySQL); improved key page load and API response times by **20%+**.
- Led code reviews for a team of **5+ developers** and introduced shared design patterns and coding standards.

Senior Software Engineer — Primus Techsystems Pvt. Ltd., Pune — Jun 2019 – Sep 2023

- Joined as an intern (Jun 2019) and grew to Senior Software Engineer, delivering **8+ client projects** end to end in fintech, manufacturing and construction, working directly with clients on requirements and releases.

Loan Origination System — Arthsetu Ventures · Angular 14, Ionic 6, Node.js, MySQL

- Built a loan app with Aadhaar, KYC and credit bureau verification and a configurable eligibility rule engine; cut verification turnaround from **48+ hours to under 15 minutes**. Published on Play Store and App Store.

Dealer Management System — Hitachi Astemo · Angular 12, Node.js, MS SQL

- Built inventory, dealer performance and sales analytics modules used by **200+ dealers**, cutting inventory allocation discrepancies by **92%**; added SMS notifications. Also built the companion Ionic product catalogue app (Android, iOS).

Construction Management System — SCON Projects · Angular 14, Node.js, MS SQL · progress, KYC and budget tracking

PROJECT

MeridianPulse — AI workplace assistant — github.com/sourabh-ambarshetti/meridian-pulse

- NestJS, Angular, MySQL, Qdrant, Gemini: RAG over HR/IT policies with cited sources, plus LLM function calling for actions on MySQL (leave balance, expense claims, helpdesk tickets).
- Server-side access control (JWT): tools act only on the signed-in employee, so prompts can't reach other employees' data. PII masking and prompt-injection guardrails.
- Wrote an evaluation script that signs in as different employees and checks answers, tool calls and cross-employee data leaks.

EDUCATION

Master of Computer Applications (MCA), 2020 · **Bachelor of Computer Applications (BCA)**, 2017
